INTRODUCTION

Safe Routes to School is a national and international movement to create safe, convenient, and fun opportunities for children to bicycle and walk to and from schools. The program has been designed to reverse the decline in children walking and bicycling to schools and can also play a critical role in reversing the alarming nationwide trend toward childhood obesity and inactivity.

Montclair’s Safe Routes to School Program began in 2005 when the Rand School (now Renaissance at Rand) was one of New Jersey Department of Transportation’s pilot Safe Routes to School Demonstration Program schools. Since then, the Montclair Safe Routes to School Program has received over $700,000 in federal grants to improve infrastructure in all elementary and middle school neighborhoods, increase traffic safety enforcement, and encourage children and their families to get active on their way to and from school. This School Travel Plan is the result of that federal funding and identifies issues and solutions that are unique to the school’s culture and priorities.

The purpose of the Nishuane Elementary School Safe Routes to School (SRTS) Travel Plan is to identify measures including both infrastructure projects and programmatic activities aimed at improving and/or encouraging walking and biking to school. These measures will serve as part of an implementable action plan which, when carried out by the school community and its partners, will encourage more Nishuane students and parents to walk, bike or otherwise engage in active ways to getting to school. Traditionally, SRTS programs look at a 2 mile radius. Because Montclair is a Magnet School System, students 1 mile or more from the school they attend are provided courtesy busing. This Travel Plan will focus on the area within a one mile radius of Nishuane School (Grades K – 2).

Nishuane Elementary School is one of 10 schools in the Township of Montclair’s Safe Routes to School (SRTS) Program. In 2008, the Township of Montclair, through its SRTS Task Force, applied for and received funding through NJDOT for the development of three (3) E’s of its district-wide Safe Routes to School program (Engineering, Encouragement and Enforcement). The goal of the Montclair SRTS Task Force’s goal was to expand on the success of the Rand School SRTS Pilot and bring a sustainable Safe Routes to School Program to all of the

Montclair Safe Routes to School Program
Safe Routes to School Travel Plan – Nishuane Elementary School

Township’s elementary and middle schools.

As part of this effort, the Township selected a consultant team lead by The RBA Group and assisted by Arterial and Meadowlink TMA (project team) to conduct SRTS workshops and develop travel plans. The travel plans stemming from the workshops compliment the work already undertaken by the Montclair SRTS Task Force, and reflect the Township’s desire to create safer, healthier, active and sustainable school environments town-wide.

In developing the Nishuane Travel Plan, the project team confirmed preliminary walking and bicycling routes and analyzed the basic elements required for safe walking and bicycling routes. Information was gathered from local stakeholders – staff, parents, as well as community members such as the Township Engineer, local police, health and bicycle advocates, board of education transportation representatives, and local crossing guards through interviews, travel surveys and the community workshops. In these workshops, stakeholders worked with the project team to identify existing barriers that limit walking and biking and opportunities that could prompt an increase in walking and biking to the school. The results of this collaboration is a list of potential projects and/or activities (action items) intended to make walking and biking to Nishuane a safer and more appealing option than taking the car.

The Nishuane Elementary School Travel Plan actively promotes the five E’s of a successful SRTS program – engineering, education, enforcement, encouragement, and evaluation. These categories provide the framework for the action items identified in the plan. At the conclusion of the project, the goal is to have the school community take an active role in improving their SRTS program goals for getting students to and from school safely using active modes of travel. This Travel Plan should be adopted by the school and updated on an annual basis to reflect changes in priorities, leadership and conditions.
A key element in the planning process was for the project team to foster partnerships within the school community. The first goal was to establish a SRTS Team leader at each school. The project team worked with the SRTS Team Leader to gain a better understanding of the challenges families face in getting their students to and from school safely. In working with closely with the SRTS Team Leader, the project team was able to set the stage for the Team Leader to move forward on his own and maintain ownership of the SRTS program. Each SRTS Task Leader was given several tasks:

- Prepare an introductory letter/email to inform parents of the SRTS program and the need to fill out the parent/caregiver survey.
- Disseminate survey.
- Identify for the consulting team the major routes to the school, and any important issues related to arrival and dismissal.
- Coordinate workshop locations, times, distribute flyers and provide snacks the day of the workshop.
- Collect data from the school via the Stakeholder Interview Sheet.
- Invite stakeholders to the workshop meeting.
- Discuss and brainstorm with the project team any incentives to use for encouragement throughout the year.
- Attend the workshops as a participant/parent and share thoughts and concerns.
- Attend the classroom presentations conducted with students by the project team, if possible.

Having established the SRTS Team Leader, the project team needed to assemble active community groups and organizers whose missions and abilities complement the goals of
Montclair Safe Routes to School Program

Safe Routes to School Travel Plan – Nishuane Elementary School

the Montclair SRTS Program in the hopes that they will be able to support and sustain the SRTS program over time. These local stakeholders were continuously invited to be a part of the development of each of the schools’ travel plans. The Nishuane School SRTS Partner Organizations List includes:

School Profile

School Description

The Nishuane Elementary School is located at 32 Cedar Avenue in the South End neighborhood. This section of Montclair is primarily residential but has a commercial district, known as the South End Business District, located on and around the southern portion of Orange Road. The school is bordered by Orange Road to the east, High Street to the west and north, Cedar Avenue to the south. The school is also adjacent to Nishuane Park, a 17.66-acre municipally-operated park.

Nishuane Elementary is part of the Montclair Public School District and has a school population of approximately 475 students in grades K-2. In Montclair’s magnet school system, all schools have a theme. Nishuane’s theme is “Gifted and Talented.”

The primary entrance for students walking or bused is located along High Street. Map 1 – School Location identifies key features of the school neighborhood such as the location of crossing guards, primary and secondary walking routes and crosswalks.

► Economic Diversity

Free and reduced-price lunch

These statistics show the percentage of students eligible for the federal free and reduced-price lunch program as reported by National Center for Education Statistics (NCES). This percentage is one indication of the student economic level (or family income level) at a school.

<table>

► Individualized Education Programs (IEPs)

These statistics show the percentage of students with Individualized Education Programs (IEPs) as reported by the state. IEPs are specialized educational programs created for students with disabilities. When planning for activities related to SRTS, we want to make sure to think about all members of the student population, including students with IEPs.

CURRENT SCHOOL TRAVEL ENVIRONMENT

Student Travel Mode

Because Montclair is a magnet school system, courtesy busing is provided to students who live farther than one mile from the school.

According to the school administration, out of the 475 students that attend Nishuane, 350 ride the school bus, 100 are driven to school by an adult, 20 walk to school and 5 ride their bike to school.

There are approximately eleven (11) buses and two (2) vans for special needs students that provide service to the Nishuane School. Students are permitted to ride their bike to school and the school has participated in a number of Walk/Bike to School Days to promote walking and biking as a means for getting to school.

Drop-Off/Pick-Up Procedures

The car line is staffed by teachers and assistants beginning at 9:00am along Cedar Avenue. Parents/guardians using the car line are not permitted to exit their car. The car line is not staffed when it is raining but parents/guardians may still pull up to drop-off their child.

Bus drop-off and pick-up occurs on High Street, which is closed to traffic between 8:30 and 9:25am and between 3:10 and 3:45pm.

For dismissal, Kindergarten students are brought outside through the main entrance by their classroom teacher. First and second grade students are dismissed by their classroom teachers through the door located on the playground side of the building.

Children who are eligible for the bus are dismissed to their assigned bus at 3:35pm.

Transportation to and from school is available for students in the Montclair Public Schools system who meet the eligibility requirements that are based on the distance from the child's residence to the school he/she is attending. According to Board policy, transportation will be provided for the following students:

1. All elementary students who reside more than 1 mile from their assigned school.
2. All middle school students who reside more than 1 mile from their assigned school.

Montclair Safe Routes to School Program
Safe Routes to School Travel Plan – Nishuane Elementary School

Excerpt from Nishuane Family Handbook 2012-2013

**School Hours**

The official hours of instruction at the school are 9:10am-3:35pm. The late bell rings at 9:20am. On early dismissal days, students are dismissed at 2:10pm. Before-school care for students of working parents is available at the school beginning at 7:30am and afterschool care is available at the school from 3:45 to 6:30pm. Parents participating in the program are responsible for transportation to and from the school. When bringing or picking up their child, parents are required to park on High Street and enter through Door #4

**Crossing Guards**

There is currently one crossing guard located at the intersection of Cedar Avenue and High Street. This crossing guard manages all four legs of this intersection.
EVALUATING OPPORTUNITIES AND CONSTRAINTS

The information gathering process for the Nishuane Elementary School followed a series of steps conducted by the project team including stakeholder interviews, data collection, workshop previews, student classroom activity and a SRTS workshop. Together, these steps allowed the project team to develop an Action Plan listing recommendations to be implemented in the school neighborhood to improve conditions for students on their way to and from school.

Stakeholder Interviews

In the spring of the year prior to the workshops, Montclair’s SRTS Coordinator Alex Kent met with the PTAs and the Principals of all the Montclair schools, and talked to them about the barriers they have to walking or biking to school, safety or otherwise. In the Nishuane Elementary School, some areas of concern (“hot spots”) within the school neighborhood were identified. Their verbatim thoughts are included below:

PTA/Parent Wish List

- Need either a crossing guard (or other enforcement), traffic light or better signage at the Llewelyn/Harrison crosswalk/flashing light. No one stops for pedestrians here.
- Find website tool which allows people to share walking/biking group info
- Use District Transportation office to connect families going to same school, living in same neighborhood.
- For busers, designate an area closer to school where kids could meet to walk the last distance.

Parents’ Thoughts

- Parents park opposite entrances on High Street and Cedar Avenue and let kids cross mid-block where there is no crosswalk.
- The sidewalks along Llewelyn Road are in poor condition.
Montclair Safe Routes to School Program
Safe Routes to School Travel Plan – Nishuane Elementary School

*Neighborhood Mapping*

**Team Observation**

Prior to the community workshop, the project team performed a field investigation to observe the conditions around the Nishuane Elementary School. Observations were made of the physical conditions all around the school campus and surrounding neighborhood; parking patterns and restrictions; auto and foot traffic and circulation using the Crosswalk data collection and assessment system.

Summaries and results of these collection efforts and field investigations are summarized in Appendix A. This summation includes detailed maps annotated with comments about the school commute dynamics and conditions for walking or bicycling to and from school. Photos of each major issue are included and keyed to the maps by number.
School Community Observation

**STUDENT CLASSROOM ACTIVITY**
Members of the project team met with a classroom of second grade students at Nishuane to discuss obstacles to walking and bicycling in their school neighborhood. Students participated in a classroom activity in the form of a focus group to help the project team identify issues and general concerns of safety around the school neighborhood. As part of the exercise, students were asked to identify issues verbally and in written form. Here are notes from the students’ activity:

- 23 students
  - 2 walkers/bikers,
  - 5 get dropped-off by parents
  - 16 take the bus

**Issues voiced by students**

- Drivers going fast near bus stops
- Drivers going fast near school
- Not always a crossing guard at Cedar Ave. and Harrison St.
  - Maybe the crossing guard can stay a bit later before and after school
- Parents drop students off on the other side of Cedar Ave and then cross the street.
- Students and parents aren’t crossing the street at the designated crosswalks.
Montclair Safe Routes to School Program
Safe Routes to School Travel Plan – Nishuane Elementary School

Community Workshop

**Observation of Student Arrival**
The project team met at the Nishuane Elementary School at 8:50 am on Wednesday, February 6th, 2013 to observe arrival of Nishuane’s students with parents and stakeholders. The purpose of this exercise was to allow workshop attendees the opportunity to have a first-hand observation of the existing and potentially hazardous behaviors within the school neighborhood.

**Community Workshop**
The workshop began directly after the observation of student arrival. Members of the Nishuane school community and local community attended the workshop to discuss Safe Routes to School program at Nishuane. The project team’s goal for this working meeting was to present sufficient information on Safe Routes to School programs to the community as well as supplying audience members with anecdotal information from their earlier discussion with students and their own observations of the schools’ arrival. Workshop participants identified barriers, areas of concerns and opportunities in the environment around Nishuane in their discussion and through the mapping exercise facilitated by the project team.
Montclair Safe Routes to School Program

Safe Routes to School Travel Plan – Nishuane Elementary School

**Vision**

- Warning sign for curb
- Defined drop-off area
- Eliminate “pandemonium”
- Walking School Bus
- Walking Club
- Paths to school
- Drop-off ONLY sign
- Restricted parking along Cedar Avenue
- Keep kids in car seat
- Remote parking

_Crossing Guard assisting family to Nishuane_

Safe Routes to School Travel Plan – Nishuane Elementary School

CREATING SOLUTIONS FOR THE SCHOOL NEIGHBORHOOD

Based on the experience and observations at Nishuane Elementary School, the project team offers the following suggestions for priority actions related to building the Nishuane SRTS program.

Top SRTS Priority Recommendations

A full listing of the recommendations are provided as options for the Nishuane Elementary School to consider while implementing its SRTS plan and are included in the Action Plan Matrix, later in this Travel Plan. The top priority concepts for each of the 5 E’s (Engineering, Education, Encouragement, Enforcement and Evaluation) are also listed here:

Engineering

- Change parking restrictions on the southside of Cedar Avenue to “No Stopping, Standing or Parking” during school days (8am-4pm)
- Create and sign “Park and Walk” locations at the South End Municipal Parking Lot and the Nishuane Park Parking Lot
- Use paint and signs to better define drop-off areas. Create a school pavement “quilt” to define the drop-off zone on the school-side of Cedar Avenue

Enforcement

- Reinforce “No Parking” areas during school commute times
- Reinforce “No U-Turns or K-turns” along Cedar Avenue or High Street on school days
- Place a variable message sign promoting safety messages around the school zone

Education

- Update and reinforce current Parent Handbook’s drop-off/pick-up procedures with: Map, rules and procedures for driving along local streets within school campus and any school driveway access
- Share the updated handbook/map of drop-off/pick-up procedures with the school community via the school and PTA websites
- Add biking/walking education and activities to the Nishuane Explorers Afterschool Enrichment Program
- Invite Meadowlink TMA and Bike&Walk Montclair to help with bicycle and pedestrian education at assemblies or weekend Bike Rodeos
Montclair Safe Routes to School Program

Safe Routes to School Travel Plan – Nishuane Elementary School

NJ TRANSIT offers a no-cost, 45-minute statewide safety education program to public, non-public and charter schools, Grades PreK-12, highlight the need for safe behavior and caution around rail systems and buses. According to NJ TRANSIT, the presentation includes an age-appropriate video, safety tips and procedures, question and answer session, and free educational materials that reinforce important safety messages. For more information or to schedule presentations, go to the Safety Education Program site at: (http://www.njtransit.com/rg/rg_servlet.srv?hdnPageAction=SafetyTo)

Encouragement
- Continue with the SRTS Program
- Circulate Travel Plan on school and PTA websites, especially the School Location Map of Major Walking Routes with Time Radius

Evaluation
- Continue to conduct student travel surveys to measure how effective the SRTS program has been in increasing the number of students walking, biking, carpooling or taking transit to school
- Perform speed studies before and after the initiation of any physical or programmatic measures, especially along Harrison Avenue and Orange Road
Incentives
To encourage families to arrive by foot, bike or any other form of active transportation, a Nishuane SRTS Team Leader should be identified. This Team Leader would work with the SRTS team at Meadowlink (the Transportation Management Agency covering all of Montclair and the surrounding area), to develop a plan to best leverage the incentive items and other SRTS efforts.

Meadowlink will be providing bicycle and pedestrian safety themed incentives, such as stickers, to Nishuane and all of the other Montclair Schools participating in the SRTS program. Going forward, Meadowlink will offer assistance in the implementation of further SRTS initiatives such as, a walking school bus or bike rodeo, and incentives for these events will be provided as necessary.

PROGRAM EVALUATION AND MONITORING
In order to continue the momentum and keep up with the growing needs of a changing school population, Nishuane should use various data collection methods to evaluate the effectiveness of its SRTS Program over time. Some of those preliminary actions should be:

- **Conduct Student Travel Mode (Hands-Up) Surveys**
  Nishuane should measure the number of children walking and bicycling to school by conducting Student Travel Mode (Hands-Up) Surveys at least twice a year. The results will be evaluated yearly to show if there has been a shift in the number of children walking and bicycling to school.

  For these surveys, Nishuane can work with their SRTS Team Leader and Meadowlink TMA to coordinate this effort with Voorhees Transportation Center at Rutgers University to tabulate survey data. A copy of the Student Travel Mode Survey can be found in Appendix B.

- **Continue to conduct Parent Surveys**
  Nishuane should continue to distribute parent/caregiver take-home/online attitudinal surveys to evaluate parents’ attitudes towards walking and bicycling to school over time. The 2012 New Jersey Safe Routes to School Parent/Caregiver Survey is included in Appendix B. Using survey information on the number of children that currently walk and bike to Nishuane as a baseline measure, these yearly surveys should be conducted to determine if there has been a shift in attitudes and/or actions since the implementation of actions related to the SRTS program. Nishuane’s SRTS Team Leader and Meadowlink
Montclair Safe Routes to School Program
Safe Routes to School Travel Plan – Nishuane Elementary School

TMA can work together to ensure that the surveys are distributed, collected and then tabulated by Voorhees Transportation Center at Rutgers University.

- **Conduct School Traffic Counts**

School traffic counts can be a good way to collect baseline data on parent/student behavior during arrival. Unlike typical traffic counts that use automated traffic counting equipment, these visual counts involve using students to manually record how students are being dropped off to school. Nishuane should institute a school traffic counts initiative to do these counts either as a single classroom activity or can use it as a school-wide motivator to get parents and students to walk and bike more often. These counts should be done at the beginning and the end of the school year to see if any of the SRTS activities have had an impact in reducing the number of cars dropping off students. It is important that the counts are done the same way each time to ensure that results can accurately compared.

The SRTS Team Leader should invite a representative from the Montclair Police Department, the Township Planner, or the Township Engineer to help kick-off the school’s traffic count initiative. The counts should be coupled with encouragement activities such as:

- Making a school-wide pledge to walk and bike more often
- Setting a school-wide goal and holding a celebration if the goal is met.
- Having class discussions on how to reduce the impacts of traffic by using alternative modes of transportation such as biking and walking.

A sample of a traffic count form can be found in Appendix C.

Before carrying out any of these activities, the Nishuane SRTS Team should consider creating a mechanism for evaluation. As noted in the *Complete Safe Routes to School Guide*\(^1\) there is a six-step process that works best for evaluating SRTS programs and is demonstrated in the following graphic:

---

\(^{1}\) This guide is maintained by the National Center for Safe Routes to School at [www.saferoutesinfo.org](http://www.saferoutesinfo.org).
Creating a plan at the onset of the program will be most beneficial in setting goals for your program and determining strategies to will help you attain those goals.

MAPPING SOLUTIONS FOR THE SCHOOL NEIGHBORHOOD

The walking environment around Nishuane Elementary School is generally in good condition. With some minor changes, the walking routes to school can be very attractive to nearby families.

*Map 2 - School Neighborhood Recommendations* (on the following page) illustrates the suggested physical improvements that are aimed at improving the overall conditions for families walking and biking to school. If implemented in conjunction with the other strategies outlined in the Action Plan Matrix (page 25), these physical improvements will offer walking and/or biking as a safe and more convenient option to getting to school.
Map 2 - School Neighborhood Recommendations

1. Enhance: Define the walk into school. Paint a fun pattern on the sidewalk to guide children into school (i.e. painted footprints).
2. Signage & Striping: Define drop-off area. Use paint and signs to better define drop-off areas during inclement weather.
3. Enhance: Relocate center railing to the sides of the steps.
4. Traffic & Circulation: Park and Walk location
5. Traffic & Circulation: Relocate the car drop-off to this side street and limit through traffic.
6. Traffic & Circulation: Move car or bus drop-offs to the parking lot area
7. Enforce: Restrict parking during drop-off times (7am to 9:30am) to allow for additional stacking.
8. Traffic & Circulation: This township lot may be used as a drop-off.
ACTION PLAN MATRIX

The following Action Plan Matrix for implementing the Nishuane Elementary School SRTS program is intended to increase safety for students on their journey to and from school and, where appropriate encourage more students to walk or bike. The tables below are organized by the logical lead entity and identify those preliminary recommendations, specific to the Nishuane School campus and the immediate area, partners, a time frame and a level of cost for implementing each recommended action.

To give the Nishuane SRTS program more depth, it is recommended that these concepts be reinforced beyond the immediate school neighborhood. Nishuane’s SRTS program can best realize full success if its community and municipal partners implement the township-wide action items that support Nishuane’s SRTS program. These township-wide recommendations have been identified in Appendix D and are organized by the 5 E format (Engineering, Education, Encouragement, Enforcement and Evaluation) for implementing the SRTS program.

APPENDICES
Appendix A. Crosswalk© Neighborhood Analysis

The following maps and notes are a record of the issues identified both during initial field observations and during the workshops as noted by participants:

Assessment Categories:

- School Location/ Crossing Guard Location
- Ideas/ Primary Destination/ Secondary Destination
- Pedestrian Issues – Good/ Minor/ Major
- Bicycling Issues - Good/ Minor/ Major
- Driver Behavior – Good/ Poor/ Bad
- Intersection Issues - Good/ Poor/ Bad
- Environmental Issues - - Good/ Poor/ Bad
Primary Destinations

1. **Bus Access Point.** This is the access point used by students arriving by bus. It is also used by students a limited amount of students that are dropped off by car early in the morning for services provided before school.

2. **Drop-off Entry.** This is the entrance that students use that get dropped off by car.

3. **Bus Drop-off.** Buses line up and drop off students along this curb.

4. **Car Drop-off.** Cars drop-off along this curb in the morning. There are usually 2-4 teacher’s assistants opening doors and helping students out of cars.
Secondary Destination

1. Nishuane Park.

2. Playground. An organized group of students meet at this playground before school.

3. Make shift drop-off location. Some cars park here and walk up to school.
1. **K-turns.** Drivers get frustrated by waiting on line and do a variety of things including k-turns, dropping of on the opposite side of the street etc.

2. **Speeding through traffic.** Cars speed through this area during drop-off.

3. **Speeding/Heavy Traffic.** Heavy traffic travels up this road and then turns onto Cedar Avenue.

4. **Queuing of Through Traffic.** Difficult to get out of the drop off line due to through traffic that is backed up.
1. **Bicycle Racks.** Bike racks are inaccessible and hidden.

2. **Fast Traffic.** Traffic moves too fast on this road for young riders (K-2).
1. Parking lot condition. The parking lot appears to be unmaintained and in disrepair. This includes the paving material, signs and fences.
1. **Good Intersection.** Prominent, visible ladder crosswalks and curb ramps.

2. **Bus Only Access.** Cars are prohibited from entering this direction during drop-off hours. This is “bus only” access. The sign is put in place every morning by the crossing guard.
1. **Curb Ramps.** Pedestrian crossing is lacking curb ramps.
Pedestrian Issue - Major

1. Pedestrian Access. Pedestrian access from parking lot is obstructed and in poor condition.

2. Mid Block Crossing. Students jump out between cars to get picked up on opposite side of street.
Pedestrian Issue – Minor

1. **Narrow Sidewalk.** 4’ sidewalk is too narrow for families and small groups walking together.

2. **Narrow Sidewalk.** 4’ sidewalk is too narrow for families and small groups walking together.
Map 3 - Neighborhood Analysis
Montclair Safe Routes to School Program
Safe Routes to School Travel Plan – Nishuane Elementary School

Neighborhood Area Photography

1. Pedestrian Access from parking lot is obstructed and in poor condition.
2. Pedestrian crossing is lacking curb ramps.
3. Bike racks are inaccessible and hidden.
4. 4' sidewalk is too narrow for families and small groups walking together.
5. Drivers get frustrated by waiting on line and doing a variety of things including k-turns, dropping off on the opposite side of the street etc.
6. Students jump out between cars to get picked up on opposite side of street.
7. Difficult to get out of the drop off line due to through traffic that is backed up.
8. An organized group of students meet at this playground before school.

</tr>
</tbody>
</table>

**Grading Period:**

*Please conduct these counts on two of the following three days Tuesday, Wednesday, or Thursday.
*Please do not conduct these counts on Mondays or Fridays.
*Before asking your students to raise their hands, please read through all possible answer choices so they will know their choices. Each student may only answer once.
*Ask your students as a group the question “How did you arrive at school today?”
*Then, reread each answer choice and record the number of students that raised their hands for each. Place just one character or number in each box.
*Follow the same procedure for the question “How do you plan to leave for home after school?”
*You can conduct the counts once per day but during the count please ask students both the school arrival and departure questions.
*Please conduct this count regardless of weather conditions (i.e., ask these questions on rainy days, too).

**Step 1.** Fill in the weather conditions and number of students in each class.

Montclair Safe Routes to School Program
Safe Routes to School Travel Plan – Nishuane Elementary School

Parent/Caregiver Attitudinal Survey
The online version of the survey can be found here:
https://rutgersbcsr.us2.qualtrics.com/SE/?SID=SV_8uZQeguvLZ7cjRP

Dear Parent or Caregiver,

Your child’s school has partnered with the NJ Department of Transportation, New Jersey’s Transportation Management Associations, and researchers at the Rutgers University Voorhees Transportation Center to learn your thoughts about children walking and biking to school.

Purpose of Survey

Safe Routes to School (SRTS) is a nationwide effort to encourage more and safer walking and bicycling to school. The goal of this study is to understand any issues or concerns you have about allowing your child to walk or bike to and from school. The information gathered will be used to assess your local, state and national Safe Routes to School programs.

Please note that all responses will be kept anonymous and neither your name nor your child’s name will be associated with any results. If you have any questions about your rights as a participant in this study, you may contact the Institutional Review Board administrator at Rutgers University at 732-932-0130 ext. 2104.

Your participation in this study is completely voluntary; however, your opinions are highly valued. If you have any questions about the survey, please contact Leigh Ann Von Hagen of the NJ Safe Routes to School Resource Center at Rutgers University at lavh@ejb.rutgers.edu, or 732-932-6812, extension 613.

Thank you for participating!

Sincerely,

Elise Bremer-Nei
State Safe Routes to School Coordinator
New Jersey Department of Transportation

RUTGERS
Edward J. Bloustein School of Planning and Public Policy
Survey Directions
Please answer the questions below for the child who brought home this survey. We ask that each family complete only one survey per school your children attend. This survey will take about 5 - 10 minutes to complete. Remember, all the requested information will be anonymous.

1. What is the name of your child’s school?  

2. In what grade is your child currently enrolled?  

3. Is your child:  □ Male  □ Female  

4. Does your school district provide your child with busing?
   □ Yes  
   □ No  

5. Does your child have a disability that prevents her/him from walking or biking to school?
   □ Yes  
   □ No  

6a. What town do you live in?  

6b. What is the street intersection nearest your home?  

7. During a typical 5-day school week, how many days does your child go to school and leave from school using these types of transportation:

   |       | Walk | Bike | School Bus | Family Vehicle (only children in your family) | Carpool (with children from another family) | Public Transit (city bus, subway, etc...) | Other | Total = 5 days |
---|---|---|---|---|---|---|---|---|---|
EXAMPLE | 2 days | 1 day | 2 days | | | | | | = 5 days |
Goes to School by... | | | | | | | | | = 5 days |
Leave from School by... | | | | | | | | | = 5 days |

8. If your child walks or bikes to school, with whom do they usually travel? (Check all that apply.)
   □ Alone  □ Sibling  
   □ Parent or Guardian  □ Other Adult  
   □ Other Children  □ My child does not walk or bike to school  

9. What is the driving distance between your home and school in minutes and miles? (Please give your best estimate)
   a. minutes:  
   b. miles:  
   □ Don’t Know  

10a. When your child walks, bikes, or takes a school bus to school, how long, on average, does it take her or him to travel from your home to school?

   | Number of Minutes | Does not... | Don’t Know |
---|---|---|---|
Walk |  | [ ] | [ ] |
Bike |  | [ ] | [ ] |
School Bus | take school bus... | [ ] | [ ] |
10b. How does your child usually get to and from school? (Check all that apply)
- □ Walk
- □ Bike
- □ Ride the School Bus
- □ Drive/Ride in Car
- □ Other

11. Does your child’s school encourage walking to and from school?
- □ Yes
- □ No
- □ Don’t Know

12. Does your child’s school encourage biking to and from school?
- □ Yes
- □ No
- □ Don’t Know

13. In what ways does your child’s school encourage walking or biking? (If applicable)

15c. Please tell us if there are any other important factors in your decision to let your child walk or bike to school?

______________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________
______________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________

Tell Us About Yourself...
These questions are asked so that we can group your responses together with those of everyone we interview.

16. What is your age as of today?

    ________ age

17. Are you male or female?

    □ male
    □ female

18. Please indicate how many people in your household, including yourself, are in each of the following age categories. [Fill in number]

    □ Under 4 years
    □ 5 to 11 years
    □ 12 to 16 years
    □ 17 to 19 years
    □ 20 to 35 years
    □ 55 years or older
19. What is the highest level of education you’ve completed?
   □ Less than high school graduate
   □ High school graduate (or GED)
   □ Some college (or technical vocational school/professional business school)
   □ Two-year college degree (AA: Associate in Arts)
   □ Four-year college degree (BA or BS: Bachelor of Arts/Science degree)
   □ Graduate work, but no advanced degree
   □ Graduate degree (Masters, PhD, Lawyer, Medical Doctor)

20. Which ONE of these descriptions of race and ethnic backgrounds most applies to you:
   □ White Hispanic
   □ White not Hispanic
   □ Black Hispanic
   □ Black not Hispanic
   □ Asian
   □ Native American
   □ Other

21. What is your total annual household income?
   □ Less than $25,000
   □ $25,000 to $50,000
   □ $50,000 to $100,000
   □ $100,000 to $150,000
   □ $150,000 or more

22. How many motor vehicles are kept at home for use by members of your household?
   _______ vehicles

23. What is your marital status?
   □ Single/Never Married
   □ Married/Civil Union
   □ Divorced
   □ Widowed
   □ Living with a partner

24. What type of residence do you live in? Is it a…
   □ Single family home
   □ Multi-family home
   □ Townhouse
   □ Apartment building
   □ Condominium
   □ Other, specify ______________

THANK YOU FOR PARTICIPATING IN THIS SURVEY
Appendix C. Traffic Count Instructions and Form
INSTRUCTIONS FOR TRAFFIC COUNT FORM

1. Have kids pair up in teams of two to count walkers and bicyclists. Car counters need teams of three.
2. Each team is assigned a location where children are arriving at school.
3. One person is the counter and the other is the recorder. When counting cars, one person counts cars and another counts the number of children in each car.
4. The counters call out a car (biker or walker) when it (they) arrives. The recorder makes a mark for the number of cars and writes out the number for the number of children per car. (Make sure they keep the tic marks in groups of five). The bike and walking counters should make marks for each child.
5. At the end they total the number of marks. Then they count how many cars that had more than one child in the car, which counts the number of carpools. Note: If the class has learned how to average, then have them compute the number of children per carpool.
6. Combine all the forms to find out how many children walked to school, biked to school, came in a carpool, or came alone in a car.
7. Return the forms to the Safe Routes to School box in the office or contact _______________ at _______________.

Thanks for helping out the Safe Routes to School program

Safe Routes to School Travel Plan – Nishuane Elementary School

SRTS Curriculum

Message:
- The adoption of a pedestrian/bicycle curriculum by a school or school district helps assure that children will receive repeated age-appropriate education.
- The Walk to School web site has a list of downloadable free pedestrian and bicycle safety education programs, including a recently developed national curriculum developed by the National Highway Traffic Safety Administration (NHTSA).

Background:
NHTSA’s Child Pedestrian Safety Curriculum teaches and encourages pedestrian safety for students grades Kindergarten through 5th Grade. It is organized into five lessons: walking near traffic, crossing streets, crossing intersections, parking lot safety, and school bus safety. Each lesson builds upon previous set of skills learned.
Montclair Safe Routes to School Program  
Safe Routes to School Travel Plan – Nishuane Elementary School  

SRTS Classroom Resources

Source: Coldfall Primary, London, UK provided by www.iwalktoschool.org;

**Message:**
In the classroom, SRTS education can be integrated into existing topics. A few examples of integrating SRTS education are:

- Safety education can be infused into traditional classroom subjects such as language arts or science taught by the classroom teacher.
- Math: calculating average walking speeds or distances.
- Biology: walk to collect samples, observe nature.
- Reading: read about nature, walking.
- Language arts: write about walking, what see on way to school, design posters to encourage walking.
- Geography: track mileage and plot on a map. Learn about places that the school or class “visits.”
- Arts: Photography contests, drawing contests where students depict their routes to school

Sample Text for Door Tag

SHOVELING YOUR SIDEWALK
IT’S THE NEIGHBORLY THING TO DO!
(IT’S ALSO THE LAW)

Make Chicago safe for everyone by clearing snow and ice from the public sidewalks around your property.

We are all pedestrians at some point in the day, whether walking to the bus, to a car, or to a neighborhood store. Without a wide, clear path, snow and ice on the sidewalk make it difficult for everyone -- especially people with disabilities, seniors, and children -- to walk safely.

Be a good neighbor and offer help to those in your community who are physically unable to clear their own sidewalks.

Chicago Municipal Code, sections 4-4-310 and 10-8-180, specifies that both homes and businesses must clear snow from sidewalks next to their property.

Please help make Chicago safe for everyone!

Appendix F. SRTS General Resources
Student Pledge

As a Pedestrian/Bicyclist Safety Smart Student
I Promise to always...

1. Stop and Look Left, Right, and Left again before I cross the street.

2. Wear and buckle a bicycle helmet every time I ride my bicycle.

3. Stay alert when walking and bicycling - I will watch out for all other traffic around me.

4. Wear bright colors if I am walking or bicycling during the day so I can be seen.

5. Take extra care if walking or bicycling in low visibility conditions or at night. I will wear retro-reflective gear and carry/wear a bright light or have required bike lights.

6. Walk on a sidewalk if one is present, if not, walk facing traffic.

7. Always bicycle in the same direction as traffic whether riding on the sidewalk or road.

8. Stay 5 giant steps away from the street when I’m waiting for a bus.

9. Stop, Look and Listen before I cross railroad tracks and never play on or near the tracks.

__________________________________________________________________________

Student’s Name                                      Date

Parent Pledge

As a Pedestrian/Bicyclist Safety Smart Parent
I Promise to set a good example for my children and all children by
making sure that....

1. My children know to Stop, Look Left, Right, and Left again before crossing
the street.

2. All family members must wear and buckle a properly fitted bicycle helmet
every ride.

3. Family members must always stay alert for traffic (no cell phones or
earphones), especially when walking and bicycling.

4. Everyone stays 5 giant steps away from the street when waiting for a bus.

5. My family wears bright colors and reflective markers to be seen in the dark.

6. My children know to Stop, Look and Listen before crossing railroad tracks
and never to play on or near the tracks.

7. My child walks/bicycles to school with me or with a group of children led by
a responsible parent, adult or older sibling.

8. I lead and encourage others around my child to lead by example by
demonstrating smart and safe pedestrian and bicycle behavior at all times.

9. I ensure the safety of all pedestrians and bicyclists by driving cautiously,
especially around children of all ages.

Montclair Safe Routes to School Program

Safe Routes to School Travel Plan – Nishuane Elementary School

Community Pledge

Safe Routes to School
Pledge to Nishuane Elementary School’s Children

Take the Pledge

In the last 35 years, our children have lost a lot of the freedom and independence they once had to explore our neighborhoods. As we have designed our communities around automobiles, activities like walking or bicycling to school have declined dramatically. We believe it’s time for a change. We pledge that by the time the kindergarten class of 2013 graduates high school, the majority of school trips will once again be made safely by foot or bicycle.\(^2\)

To our children, we pledge to make your health and safety our number one priority, including to:

• Make the streets safe, convenient and attractive enough to let you walk or bicycle to schools.
• Ensure the streets around your schools have frequent, safe places to cross.
• Drive slowly through school zones.
• Enforce traffic laws in school zones and neighborhoods to slow down motor vehicle traffic.
• Locate schools within walking and bicycling distance of as many pupils as possible.
• Reduce the amount of traffic around your schools.
• Provide secure bicycle parking at your schools.
• Teach traffic safety skills routinely throughout your school career: first as a pedestrian, next as a bicyclist, and then as a motorist.
• Encourage staff and students at your schools to walk and bicycle more often.

Signed (any combination of the following),

Mayor
Township Council
Township Manager/Administrator
Township Engineer/Public Works
Township Planner
Township Police
School District Board of Education
School Principal
School Teacher(s)
School Nurse
PTA/Parents/Caregivers

Community Liaison
Other community groups

\(^2\) Pledge to Children is based on the Active Living Resource Center’s SRTS Pledge.
Bike Rack Considerations for Placement

**Bike Racks**

Students must have a functional, secure place to park their bike once they reach school. Not having a well-planned bicycle parking option can lead to several undesirable outcomes, such as theft, damage, and locked bikes in or on critical safety infrastructure like emergency exits, hand rails, and fire hydrants.

According to the Association of Pedestrian and Bicycling Professionals Bicycle Parking Guidelines, there are four elements to a bicycle rack system:

1. **The Rack Element**
   The rack element is the part of the bike rack that supports one bicycle. A good bike rack element holds the bike frame without binding the wheel and should have no moving parts. Rack elements are typically constructed of metal in an inverted U-shape, which allows for a variety of bicycle sizes and locks.

2. **The Rack**
   A rack is one or more rack elements joined on any common base or arranged in a regular array and fastened to a common mounting surface. Anchor the rack so that it cannot be stolen with the bikes attached and provides easy, independent bike access. Inverted U-shaped rack elements mounted in a row should be placed on 30” centers, allowing two bicycles to be secured to each rack element.

3. **The Rack Area**
   The rack area is a bicycle parking lot where racks are separated by aisles and may contain one or more racks. If possible, the rack area should be protected from the elements using any combination of structures, like a wall and awning. Try to avoid locating a bike rack area on grass or dirt as a rainy day can turn the bicycle parking lot into a mess. Instead, locate the bike rack area on a concrete pad.

4. **The Rack Area Site**
   The rack area site is the relationship of the rack area to a building entrance and approach. Locate the bike rack area within visibility of the building entrance it serves and consider the route cyclists’ use to approach that entrance. Bike rack areas should be sited in a space that minimizes vandalism and maximizes use, while avoiding conflicts with driveways, buses, and large numbers of pedestrians.

Ideally, rack areas should be sited as close, or closer, than the nearest car parking space and provided near all high traffic building entrances. When choosing between a larger bicycle rack area or multiple smaller rack areas, it is preferred to choose multiple locations that are more convenient to users.

### Safe Routes to School in New Jersey Info Sheet

<table>
<thead>
<tr>
<th>Description:</th>
<th>NJ DOT supports Safe Routes to School and Complete Streets initiatives in NJ.</th>
<th>Voorhees Transportation Center (VTC) is the home of the NJ Safe Routes to School Resource Center and the New Jersey Bicycle and Pedestrian Resource Center.</th>
<th>New Jersey’s 5 TMAs each offer assistance in their service areas by forming alliances with non-profit, public/private sectors to assist local businesses, governments, and schools with transportation services and to solve transportation problems or issues.</th>
<th>Safe Routes to School National Partnership is a non-profit organization providing assistance for safe walking and bicycling. The Partnership is a network of over 600 organizations, agencies, schools and professional groups.</th>

Safe Routes to School Travel Plan – Nishuane Elementary School

NJ SRTS Recognition Program

Enroll in the New Jersey Safe Routes to School Recognition Program

Participants can be: Schools (public, private, or charter) and municipalities.

Level | Achievements
--- | ---
**Get Going!** | • Complete a nomination form online
Get your SRTS program established.

**Build Momentum!** | • Complete First Step achievements
Start annual traditions and build SRTS awareness.

- Endorsement letter or Resolution of Support from municipal government, school board or other equivalent body
- Hold at least two SRTS programs or events such as walk to school day or a bike clinic

**Achieve Sustainability!** | • Meet Bronze Level achievements
Help your municipality get Sustainable Jersey certified.

- Meet one of the following requirements:
  - Hold a total of 4 or more SRTS events
  - Create a School Travel Plan
  - Conduct SRTS tally, parent/caregiver survey or walk/bike assessment

**Keep it Going!** | • Meet Silver Level achievements
Make your SRTS program part of your school’s identity.

- Show ongoing support from PTA, PTO, Green Team, etc.
- Complete at least two higher level SRTS projects from the approved list

Get started! Visit us at saferoutesnj.org for more information and to contact your regional coordinator.
Nomination form deadlines: December 1 and May 1.

You can also become a friend of the New Jersey Safe Routes to School Program by completing an online enrollment form and agreeing to support, promote, and encourage SRTS programs.

Smart Cycling Classes

Learn to Ride Kids
Is your child at that age where he or she wants to ride a two-wheeler? If so, this class is for you.

This class teaches a safe, easy, effective way to learn to ride. Using this "balance-first" method, our facilitators help get these children rolling while the child does most of the work. Participants learn the basics of balancing, starting, stopping, and steering a bike, as well as proper helmet fit and adjustment. Most people learn to ride their bike while taking the class, but even if they don't, they will leave with an easy, hands-free, crash-free, and low-stress way to learn to ride.

Learn to Ride Adults
This is the same course as the Kids Learn to Ride, but has been tailored specifically for adults.

Ride Rodeo Workshop
This workshop takes those who have demonstrated that they can ride their bikes, and enhances their skill levels to be able to ride on the streets and trails. This is for young people and adults alike.

This year we are also reaching out to Safe Routes to School (SRTS) initiatives, as well as School PTAs and Church Groups in our area to offer customized Ride Rodeos as part of a larger bike safety awareness program. Contact us for details.

Street Savvy Cyclist
Bike&Walk Montclair's goal is more bikes and feet on every street. We start by showing you how to be visible, predictable and courteous to motorists, pedestrians, and other cyclists. You'll see a short video about road safety from a "Kid's Eye View" of the road. We'll take you through the proper way to enter and progress through intersections. Most importantly, we all go out on a short ride through the streets of Montclair. We encourage families to take the class together. Learn the safe way to be smart cyclists, individually, and as a group. Once the class is over, we will help you find a group ride for your skill set and schedule.

All Classes & Workshops

All classes and workshops, whether Learn to Ride or organization-specific Ride Rodeos, are taught by Certified Instructors from the League of American Bicyclists (LCIs)

Learn to Ride: Weekends April through September
Montclair High School Faculty Parking Lot
North Fullerton Avenue
(at Chestnut Street)

Duration: Approximately 2 hours

Refreshments Provided

Registration
Online registration is requested for the Learn to Ride classes prior to the class to insure enough instructors are on hand:
http://bikewalkmontclair.org/bike-edu/smart-cycling-course/

Registration at Rodeo Rodeos through the SRTS initiatives, and through Church groups will be handled through the school PTAs and the specific organizational bodies involved.
