

A Lifetime of Being Active Begins on the Way to School

Walking and bicycling to school is a great way to make physical activity a part of the daily routine. It is a healthy habit for the whole family.

Safe Routes to School

is a national initiative to make routes safer for all children to walk and bicycle to school.

Why?

Walking and bicycling to and from school offers children and our environment a wide range of benefits including:

- less roadway congestion
- less gasoline consumption
- cleaner air
- healthier and happier children
- more lively and engaged communities

We can help!

The NJ Safe Routes to School Resource Center helps communities find solutions to create safer walking and bicycling environments for children.

For more information, check the online resources offered by the NJ Safe Routes to School Resource Center at saferoutesnj.org.

Goal

To get more students walking and biking where it is safe, and where it is not safe to walk and bike to school, make it safe.

Regional Safe Routes to School Coordinators can help with:

- Walk and bike to school events
- Walking school bus programs
- Youth bicycle and pedestrian education
- School travel plans
- Surveys that provide evaluation and feedback on local programs

RUTGERS

Edward J. Bloustein School
of Planning and Public Policy

In partnership with the New Jersey's Safe Routes to School Resource Center, Regional Coordinators at the state's eight Transportation Management Associations are ready and willing to offer advice and assistance in getting programs off the ground in communities in all 21 counties. The NJ Safe Routes to School Resource Center is managed through the Alan M. Voorhees Transportation Center within the Rutgers' Edward J. Bloustein School of Planning and Public Policy.
