This report is supported by the New Jersey Department of Transportation and the New Jersey Department of Environmental Protection with funding from the United States Department of Transportation's Federal Highway Administration. New Jersey and the United States Government assume no liability for its contents or its use thereof.

The Summit was hosted and organized by the Alan M. Voorhees Transportation Center (VTC) which is housed at the Edward J. Bloustein School of Planning and Public Policy as part of Rutgers, The State University of New Jersey. Summit hosting included support from Civic Eye Collaborative (CEC) for technical support and visuals under contract through NV5.

Thank you to our sponsors, the NJ Department of Transportation and the NJ Department of Environmental Protection, for supporting this effort. Without their contribution and continued support, this summit could not have been possible.

Summit Goals

- This summit was a cooperative effort between NJ Department of Transportation (NJDOT), NJ Department of Environmental Protection (NJDEP), and various conservation, recreation, and transportation groups (Summit Planning Committee members) to organize a virtual statewide trails summit.
- The New Jersey Trails Summit was a two-day virtual event held September 22 & 23, 2021, with panel sessions (sponsored by NJDOT and NJDEP) available free of charge to participants across New Jersey.
- The Summit was hosted and organized by the Alan M. Voorhees Transportation Center (VTC) at Rutgers, The State University of New Jersey with support from Civic Eye Collaborative (CEC) for technical support and visuals under contract through NV5.
- The audience included trail, health, environmental and transportation professionals, trail advocates, county and municipal planners, county and municipal elected and appointed leaders, and staff from Metropolitan Planning Organizations and state agencies.
- The purpose of this event was to:
 - Broaden the conversation around trails and greenways.
 - Increase local knowledge about the funding, design, construction, maintenance, and use of multi-use paths, trail crossings and Complete Streets.
 - Envision more interconnected networks across the state.
 - Highlight the work that NJDOT and NJDEP do to enhance communities through trails, greenways, and transportation infrastructure.
 - Serve as a springboard for a potential webinar series and/or other educational events that could be advanced by partners, state, regional, county and local government, and the advocacy/non-profit community.
 - Encourage further collaboration across state, regional, and county departments to improve public health, safety, equity, accessible mobility, environment, and access to the outdoors

Social Media Toolkit

- A “Social Media Toolkit” document was created with drafts of registration announcements and weekly reminders.
- Images for social media posts were carefully selected to be eye-catching but also avoid copyright issues.
- Subjects in photos were also considered, to show a diversity of users and avoid the impression that trails are “exclusively for wealthy or white residents.”
- The content of each post was approved by NJDEP and NJDOT Communications, and shared via email with **over 130** NJ groups on a partner organizations list for them to post on their own social media accounts.
- **Engagement results (#njtrailssummit21):**
 - 50 tweets (+ 49 retweets)
 - 18 facebook posts

Welcome to New Jersey's first-ever Trails & Greenways Summit!

NJ Trails & Greenways Summit 2021
September 22, 2021 - September 23, 2021

Welcome to New Jersey's first-ever Trails & Greenways Summit!

This virtual summit, co-sponsored by the New Jersey Department of Transportation and the New Jersey Department of Environmental Protection, is an opportunity to highlight the many of our state and regional transportation projects and to explore secondary projects as an increasingly important part of New Jersey's transportation and recreation network.

This and previous summit sessions have been a success. The summit is a great opportunity to bring together state and regional transportation professionals and to share best practices in planning, design, and implementation. The summit is a great opportunity to bring together state and regional transportation professionals and to share best practices in planning, design, and implementation.

Benefits of the Summit

- Be empowered to improve accessibility in the built environment within your community
- Value connections, meet new partners, and learn about funding opportunities for local projects
- Strengthen the community around our state's trail and greenway infrastructure and envision a means to sustain them
- Be inspired by innovative speakers and presenters on innovative projects from around the state
- Learn more about best practices in inclusive trail and greenway planning
- Advance your expertise in trail and greenway design and implementation
- Network with state, regional, and local experts and advocates

Who Should Attend

This summit is open to anyone aspiring to enhance our state's trail and greenway network. Examples include:

- Trail enthusiasts
- County and municipal planners and engineers
- Parks and recreation staff
- Local open space and recreation committee members
- Metropolitan planning organization staff
- County and municipal elected or appointed leaders
- Trail professionals and advocates
- Local bike walk & safe routes champions or groups
- Senior and youth groups
- and any other organizations related to environmental issues, accessibility, conservation, vulnerable or sensitive populations, sustainable transportation, and more!

We hope you will make good use of these two full days of virtual presentations, panel discussions to learn more about best practices in trail and greenway facilities in planning, advance your education in the field, and network with state, regional, and local experts and advocates.

Pre-Summit Session Coordination: Run of Show

- Sessions were coordinated based on a Run of Show document which was shared with each speaker and session moderator. The run of show included session check-in and speaker timing, welcoming and closing remarks, overall speaker content, and other details.
- Speakers were also provided pre-event questions that were collected during the registration process. These questions were used by moderators for the Q&A.

9:30 AM	Countdown Timer Ends/ Keynote Presentation Begins * Introduction: Elise Bremer-Nei & Brandee Chapman Elise: Good morning and welcome to New Jersey's first-ever Trails and Greenways Summit! I'm Elise Bremer-Nei, Bicycle and Pedestrian Coordinator with the New Jersey Department of Transportation. Brandee: And I'm Brandee Chapman, State Trails Coordinator with the New Jersey Department of Environmental Protection. We are so happy to be here (virtually) with you today. This event is the result of countless hours of effort from advocates and public officials around the state, who have been working hard to bring this event to you, and we have so many amazing speakers lined up for these next two days chock-full of panel sessions and keynote presentations. Elise: Yes, and we'd like to thank NJDOT and NJDEP both for co-sponsoring this event. Without the support and coordination for both state agencies, none of this would have been possible. We hope the success of this summit leads to even more fruitful efforts as we work to build a world-class system of trails and greenways throughout our state. Brandee: We would also of course like to thank our Summit Planning Committee, who worked tirelessly to bring together such an amazing event. Elise: This conference will hopefully serve as an opportunity for you all to network, share ideas, and deepen your understanding about NJ's growing network of safe walking, cycling, and rolling corridors that connect our communities. We hope this summit inspires you to organize in your own communities, and work together to improve access to trails and greenways for everyone. Brandee: The summit sessions will span across two days. This morning we will open with a keynote session including welcome remarks from the Commissioners at NJDOT and NJDEP, representatives from the US Department of Transportation and the Federal Highway Administration, and finally a presentation by Camden Community Partnership's Meishka Mitchell about the Circuit Trails Network. Elise: Following that, we have three panels rounding out the day to talk about New Jersey's regional trail network, strategies to secure funding for trails in your own towns, and how to plan more inclusive trails which are accessible to all. Tomorrow	8 min

Pre-Summit Session Coordination

Session 2 – Finding the Money: How to Get Your Trails Project Done

 Leigh Ann Von Hagen, Moderator Voorhees Transportation Center, Rutgers University	 Laine Rankin New Jersey Department of Transportation
 Julie Bell National Park Service	 Becky Taylor BTaylor Public Affairs LLC & Lawrence Hopewell Trail
 Brandee Chapman New Jersey Department of Environmental Protection	 Denise Chaplick Morris County Park Commission

Session 3 – Building Trails for Everyone: Inclusive Trail Planning

 Justin Dennis, Moderator Trust for Public Land	
 Renae Reynolds Tri-State Transportation Campaign	 Eleanor Horne Lawrence Hopewell Trail
 Kandycy Perry New Jersey Department of Environmental Protection	 Peter Dolan New York-New Jersey Trail Conference

- Each speaker emailed VTC presentation slides and any handouts 1-3 days prior to the Summit.
- VTC staff combined speaker slides into one session document.
- VTC created session speaker contact slides.
- VTC staff coordinated with session moderators to keep track of time and work with speakers on Q&A.
- VTC created attendee feedback questionnaires.
- CEC coordinated and updated Pheedloop site content, registration confirmation and Summit reminder emails, and posted attendee feedback questionnaires.

Day-of Session Coordination

- Thirty minutes prior to the start of each session, speakers signed in to a Zoom link. VTC staff welcomed all the speakers for a final tech check and provided session logistics. CEC ran a 5-minute countdown timer overlaid on a session holding slide to start each session on time.
- Either VTC or CEC staff ran speaker slides so presenters did not have to coordinate screen sharing while speaking.
- Each session began with a welcome by either NJDOT or NJDEP staff, followed by an introduction of the panelists by the session moderator.
- Moderators kept track of panelists timing plus Zoom Q&A during the session. Panelist were able to type answers in Q&A during the session. VTC and CEC staff monitored Pheedloop Chat and Zoom Q&A for content. The Zoom Chat was disabled for attendees.
- The following announcement was sent out through Pheedloop, “Remember that this is a learning space and we are learning together. Please comment with respect.” One inappropriate comment was removed.

Technical Support

- An Issue Tracking List was created to manage support requests leading up to and during the event.
- CEC staff were available on-call to handle technical issues day-of, and VTC staff were available to troubleshoot with users, who were provided a direct hotline number to call. VTC staff answered emails to njtrails@ejb.rutgers.edu throughout the event.
- Some attendees reported issues/complaints about access to the online platform. Some issues were with the platform, other issues were with user equipment or Internet bandwidth. All issues/complaints calls or emails were resolved to the extent possible.
 - Emails from phedloop and/or from njtrails@ejb.rutgers.edu ended up in some people's spam folders.
 - Some users had trouble logging in and navigating the online platform user-interface.
 - Some users reported visual and sound bugs between online platform and users' web browsers:
 - Chrome - fullscreen option cut visual of speakers and only provided slide views
 - Firefox - sound clarity issues
 - Safari, Edge - reports of occasional dropping out requiring users to sign-in again
 - Internet Explorer - unsupported

Session Feedback

“I was thrilled to learn about the number of trails that are being planned. I bike the trails along the Delaware often and am glad that the trails will someday connect to other parts of NJ and PA”

“I was so happy to see how much work is being done, and how much money has been allocated to mapping and publicizing our trails. Yay!”

Session Feedback

Do you have any other suggestions or feedback about this topic or session you would like to share?

"Would have loved to go more in-depth about different funding options. Perhaps next time do a deep dive into the funding of a recent successful project. Would have also been good to hear how different public funds were leveraged against each other."

"You make it sound so easy. But what about the opposition, outreach challenges, and how to overcome them."

"Great to have all 3 MPOs, NJDEP and NJDOT represented, and covering trail initiatives throughout the state."

End of Summit Questionnaire Results

How would you rate NJ's first Trails & Greenways Summit on the following?

End of Summit Questionnaire Results

- Attendees were flexible with availability, but tended to prefer mid-day on weekdays.
- Most generally preferred having an option to attend online, although many were open to in-person outdoor sessions.
- Almost all attendees were interested in receiving more information about NJTAN.

How would you prefer to attend a Trails Summit?

What time works best for you to attend online sessions?

Would you like to sign up to receive more information about the New Jersey Trails Action Network?

End of Summit Feedback

“Natural surface trails-construction, maintenance; working with powerline right-of-way for connectivity; deterring ATV use”

“Maintenance, liability, creative programming, effective organizational structures, non-grant fundraising, work of the NJ Trails Council”

End of Summit Feedback

What resources would help you to plan and build trails and/or greenways in your community?

“Design, planning, engineering, funding opportunities”

“Direct contact with subject matter experts for guidance and references to tried and tested methods and approaches”

End of Summit Feedback

"It was very informative and opened my eyes to what other organizations are doing."

"Absolutely terrific summit...both content and all the logistics! Bravo! Well done!"

"This summit had an excellent mix of topics, expertise, viewpoints, and conversation. Thank you!"

"Should be an annual activity!"

Week of the Trails Summit!

Schedule

- The tight schedule meant many items were due each week, which required dedicated staff from VTC and CEC to stay on top of daily tasks.
- Some unanticipated tasks arose after the scope and budget were final, e.g. press releases, welcoming and closing remarks content, etc.
- Many tasks were delayed after approvers requested additional staff reviews.

Documents

- There were few reference documents/templates available, most needed to be created from scratch.

Communication

- File sharing was a challenge. Many files were too large to send by email.
- State agency staff were unable to access Google Drive. There were also challenges with access restrictions to OneDrive, SharePoint, and Box.

Mitigation Strategies

- Implement systematic progress tracking/communication tools:
 - Update and share schedule/tasklist during weekly core working group meetings to make sure all know status and assignee for each task, and on-track status
 - Approval checklist to clarify what is pending on whose approval
 - Speaker confirmation spreadsheet to maintain contact information and status of confirmation/materials received
- Copy the event organizing team on all emails so follow-ups would come from "trusted" email addresses, not just the njtrails@ejb.rutgers.edu email.
- Post critical information about how to attend, helpline numbers, etc. in multiple places.
- Explore how to better use SharePoint for sharing files with NJDOT and NJDEP.
- Explore comparable online platforms to PheedLoop at different price points and assess functionality and reliability.
 - If PheedLoop were to be used again, consider increasing the budget to allow for "Meet and Stream" rather than using the "free" Zoom integration. This would cost more money but may eliminate browser-compatibility issues.
